

Curtis M. Loftis, Jr., Treasurer

SOUTH CAROLINA LOCAL GOVERNMENT INVESTMENT POOL

Administered by South Carolina State Treasurer's Office

TREASURER'S MESSAGE

Curtis M. Loftis, Jr.
Treasurer

Greetings to you in the New Year! I hope that you enjoyed some well-deserved time off during the holidays. But as the old adage goes, "Money never sleeps," and our LGIP team continued its work to ensure your funds were wisely invested and provided these key benefits for you: a well-managed portfolio designed to preserve capital and reduce risk, a competitive yield that is responsive to market conditions, and easy online access to address your specific liquidity needs.

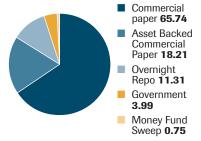

Courtney Hogue has been the LGIP account administrator for the Treasurer's Office for the last few years and has done an outstanding job assisting our participants. She was recently presented with an advancement opportunity at another state agency, and as such, Melona Lacomba has now assumed that role. Rest assured you will continue to receive excellent customer service for your LGIP accounts.

We are also proud to unveil our new <u>LGIP video</u>. I encourage you to share this with your leadership as well as your peers who might not yet be investing in LGIP. We know that LGIP is a valuable resource for our local governments, school districts, special purpose districts and other political subdivisions. We hope you will share your positive experiences with other public finance professionals in your community.

LGIP AT A GLANCE

COMMENTARY

A volatile fourth quarter provided a fitting end to 2020. As the cooler weather sent more people inside, the long-dreaded second wave of Covid-19 arrived. Despite the spike of new infections, state and local governments did not mandate the same widespread shutdowns seen in March. A common strategy was to target certain types of businesses, such as entertainment venues and restaurants. These less stringent measures mitigated the economic damage of the resurgence, though they still muted improvement in some activity, including the progress made by the labor market. Many Americans remained unemployed as businesses slowed their pace of rehiring employees. Calls grew for Congress to deliver another round of fiscal stimulus, as many months had passed since the CARES Act in March. The Federal Reserve in particular, made clear that government action was needed to complement its aggressive monetary policy. These entreaties were not heeded in the first two months of the quarter, shelved by the politically charged atmosphere of the national election.

In its last Federal Open Market Committee (FOMC) meeting of the year, policymakers left the target range of the federal funds rate at 0-0.25%, and all FOMC participants projected it to remain in this range throughout 2021. They also announced that the Fed will continue the asset-purchase program at the current pace. In response to the Treasury Department's decision to let most of the emergency lending facilities expire at the end of the year, the Fed aggressively argued that these programs still were needed to support an economy struggling to recover.

As the reporting period came to a close, the U.S. FDA approved the use of two Covid-19 vaccines, bringing hope that the pandemic might soon end. The rollout began with health-care professionals and other frontline workers, with plans to expand to the greater population in the coming months. The wait for more fiscal support ended when Congress passed a \$900 billion relief bill, although the amount of payments to Americans remained under debate.

Treasury yields ended the quarter with 1-month at 0.05%, 3-month at 0.08%, 6-month at 0.09%, and 12-month at 0.11%. The London interbank offered rate (Libor) ended the quarter with 1-month at 0.14%, 3-month at 0.24%, 6-month at 0.26% and 12-month at 0.34%.
