#### Please explain how these funds will be used to provide a public benefit:

The applicant Tri-Community Center is the 10-acre campus site formally known as Sandridge Elementary school. These funds will be used to restore the site's baseball field to a functional baseball/softball/general activity complex. The Center's leadership has solicited and received positive comment and input in support of the use of the funds for this restoration project. The project further supports the Center's mission and vision of "lessening of neighborhood tensions, promote community resiliency (combat against community deterioration) and reducing juvenile delinquency by offering a variety of community and social programs appropriate for all populations".

Given the proximity of the nearest such facility, the rehab of the ball field establishes a multi-purpose complex site in what is now considered a community recreational site desert for approximately 700-800 households and perhaps as much as 3,000 to 4,000 individuals. A functional ball field will also support local economic growth and development. Studies have shown that the benefits of exercise and other physical activeness extend to improving individual and mental healthiness. Studies also show that organized and intramural activities and games instill creativity in finding ways to improve focus, develop concentration, enhance internal skills for handling pressure, improve positive risk-taking skills, and accepting responsibility for performance.

This project also promotes community representation, team buildings, and athletes at all levels learn the fun and joys of healthy rivalries, winning and being defeated. Feelings of hometown team honor will instill pride, joy, and other positive attributes supportive of overall community resiliency.
